Experience	13+ YEARS	SCE No:	3095331009	

Sectors: Power & Water, Oil & Gas, Petrochemicals

Main clients: Saudi Aramco, Saudi Electricity Co, Ma'aden, SWCC, Marafiq, Sabic

Type of projects: EPC Turnkey projects of pump skids, compressors, valves, actuators, starting packages, cooling systems, piping etc

"Key words" **Turnaround Maintenance** projects of Turbines, generators, compressors, pumps, gearboxes and other rotating equipment.

Gas Turbine overhauling (CI, HGPI and MI) and Generator overhauling of turbines GE frame 7001EA, 6001B, 5001P.

Work responsibilities:

- ▶ Responsible for complying with all project Management process included but not limited to estimating project budget, pre and post bid clarification, attend customer meetings, Plan schedule of work, plan project resources and procurements, full Engineering support, monitor & control project work, start-up & commissioning. And closing the project
- ▶ Managing multiple projects with full Engineering support and fulfil all site requirements
- ▶ Review the base & detailed design of EPC contracts.
- ▶ Monitor Engineering progress against budget and forecasted schedule.
- ▶ Ensure every document generated by the project resources allocated is prepared, checked and approved in accordance with the client quality management systems.
- ▶ Ensure safety and QA programs are established and maintained by all parties
- ▶ Having a main technical experience of gas turbines, pumps, compressors, gearboxes, piping and valves. (installation, alignment, balancing, overhauling, rehabilitation, troubleshooting, commissioning, welding, repairing,)
- ▶ Having a very well experience of civil works of trenches , foundations , steel structures
- ▶ Having a very well experience of E&IC works of instruments, power & signal cables selection and installation

► Having a very well experience of firefighting works of (CO2, FM200 and Foam+water) firefighting systems

Description : 70 MW Coal based Thermal Power Plant (Green Field Project).
Position : Mechanical Engineer

JOB RESPONSIBILITIES

- Responsible to ensure effective implementation and control of all mechanical activities in a planned manner to reduce breakdown.
- Preparing technical documents as per the project requirement for the system testing, operating procedure, system training document for the client.
- Tracking and analyzing condition monitoring activities for predictive and proactive maintenance.
- Prepare project progress report for complete project based on project progress.
- Team lead for carrying out complete overhauling of the CO2 Reciprocating compressor & completing before the planned schedule (Make: - Burckhardt Compression).
- Carried out preventive maintenance for the API/ASME Centrifugal pumps.
- Carried out routine preventive maintenance for the diesel engine for firewater pump.
- Carried out preventive maintenance for the compressors and auxiliaries.
- Conducting the complete overhauling of the coalescence type separator tank.
- Design lead for complete fuel unloading skid (material selection, skid design, system design etc.)
- Team lead in Conducting complete gas turbine & generator overhauling activities (CI, HGPI & MI) for Frame-7, Frame-6, Frame-5 (Make:- General Electric Gas Turbines).
- Leading the Design & Engineering requirement for the mechanical rotating equipment's, piping system for the projects in coordination with client and Engineering consultant.
